in linkedin.com/in/chaudharyakifmnbrands

## SUMMARY

I am a self-motivated BS IT student at Virtual University with hands-on experience in building responsive full-stack web applications. I work with modern tools like React.js, Tailwind CSS, Bootstrap, Ant Design, Node.js, Express.js, MongoDB, and REST APIs.

I've built CRUD apps with file uploads, JWT-based authentication, protected routes, and role-based access. I also use Supabase for real-time data, Cloudinary for storage, and deploy projects on Vercel.

Certified in JavaScript (SMIT), Web Development (Saylani), HTML, CSS, Digital Marketing, and Cybersecurity. Fluent in English and Urdu, I'm always eager to solve real-world problems through code.

## CERTIFICATES

**Oct 2024 - Jun 2025**

### SAYLANI MASS IT TRAINING

**Mern Web and Mobile Apllication Development**

**Jan 2025 - Mar 2025**

### TECH HUB

**Advance Website Development**

## EDUCATION

**Oct 2024 - Oct 2028**

### UNIVERSITY OF VIRTUAL UNIVERISTY

**Bachelor of Science in Information Technology**

## EXPERIENCE

### MERN DEVELOPER

**July 2025**

- Working on YouTube and creating personal projects under the name AHTCoders.

### MERN STACK DEVELOPER (INTERN)

**Adzio Company   (5 months)**

- Developed full-stack web applications using MongoDB, Express.js, React, and Node.j
- Built secure RESTful APIs with JWT authentication for role-based access
- Designed and implemented responsive UI components with Tailwind CSS and Ant Design
- Integrated frontend with backend using Axios for smooth data flow
- Managed CRUD operations, dashboards, and improved application performance
- Collaborated with the team to debug issues and optimize features

## PROJECTS

**Project Name: Multi-Vendor E-Commerce Platform (MERN Stack)**

**Description:**

Developed a full-stack multi-vendor e-commerce system using MongoDB, Express.js, React.js, and Node.js with role-based authentication (Super Admin, Admin, Seller, User). Implemented product & order management, seller approval workflow, Stripe payments, Cloudinary image uploads, email notifications, analytics dashboard, and a category-based AI chatbot. Built responsive UI using Ant Design, Tailwind CSS, Chart.js, and Framer Motion.

**Project Name: DonateHub – Charity & Donation Management System**

**Description:**

Developed a MERN-based web application connecting NGOs and donors with secure JWT authentication. Implemented role-based dashboards, campaign management (CRUD), donation tracking, search & filtering features using React (Context API), Node.js, Express, MongoDB, Tailwind CSS/Ant Design, and Axios.

**Project Name: FoodPoint – Multi-role Food Ordering Web App**

**Description:**

- Developed a UK-style food platform with Superadmin & Cashier roles.
- Features: role-based login, product & menu management, order processing, deals, analytics, and invoice generation.
